

ONE PLATFORM · FOUR PROGRAMMES · PRIVACY COMPLIANCE MANAGEMENT

Privacy law is outpacing your ability to track it.

Twelve-plus regulations. Data moving through more vendors, tools and jurisdictions than any spreadsheet can follow. Every DSAR and breach starts a clock the moment it lands. **PrivIQ closes that gap — one configurable platform for data mapping, governance, risk and response, built to prove your compliance, not just claim it.**

A moving regulatory target

12+ privacy regulations and counting — each with its own rules, deadlines and evidence requirements.

Deadlines that don't wait

DSARs and breach notifications start the clock the moment they land. Manual tracking is how deadlines get missed.

Compliance nobody can see

Spreadsheets and inboxes make it nearly impossible to show a regulator who owns what, and when it was done.

THE FULL PRIVACY LIFECYCLE, IN ONE ENGINE

DATA MAPPING

End-to-end visibility of data flows — by department, purpose and subject type.

GOVERNANCE

Policies, notices and ROPA — published, current and acknowledged.

RISK ASSESSMENTS

DPIA, TIA and bespoke assessments, scored by severity × likelihood.

DSAR & BREACH

Structured workflows with a full audit trail from intake to resolution.

WHAT IT GIVES YOU BACK

Time back for a stretched privacy function

PrivIQ replaces the DSAR spreadsheets, policy chase-ups and manual audit prep eating your week — automating the busywork so your team can focus on judgement, not admin, while giving you clearer visibility into where the real risk sits.

Audit-ready, on demand

Real-Time Audit gives you a point-in-time snapshot of your entire privacy programme — compliance scores, risk scores and a comparison against your last audit — so you can hand a regulator or your board the evidence the moment it's asked for.

ONE PLATFORM. FOUR PROGRAMMES. Add a programme when you're ready — every one shares the same engine, evidence and reporting.

Privacy Compliance

Data mapping, ROPA, DSARs, breach response, consent, policies & reporting.

AI Governance

Govern, Map, Measure, Manage. NIST AI RMF built into the product.

Third-Party Risk

Classify, assess, evidence and reassess vendors — including AI vendors.

GRC & Operational Risk

Tailored frameworks for operational risk, on the same engine.
